FIRESMART AND WILDFIRE MANAGEMENT SERVICES

Albertans understand all too well the devastation wildfires can bring to our communities. With climate change, we seem to be seeing more frequent and intense fires. FireSmart is a national program aimed at reducing the risk of and managing wildfires.

Preparing for the threat of wildfire is a shared responsibility among homeowners, industry, and government. All stakeholders need clear communication and management to develop practical plans. CPP Environmental is here to help you protect the livelihood of our communities.

We have a dedicated team of Registered Professional Forest Practitioners with extensive experience in FireSmart planning, operations, and vegetation management. We have worked with municipalities, First Nations and Métis communities, and local fire departments to manage exposure to the risk of wildfire. Nothing helps bring peace of mind like a well thought out and executed plan, and CPP Environmental is ready to provide you their expertise.
