# CPP ENVIRONMENTAL

CPP Environmental is an industry leader in sustainable development, restoration, and conservation in Western Canada. We are an award-winning environmental consulting firm specializing in land, water, and natural resource management for public and industrial sectors. Our team of highly experienced and trusted multidisciplinary experts have successfully seen more than 1,000 environmental projects through to completion.

Our firm possesses complementary levels of professional consulting and project experience, from newly minted technicians to senior professionals with over 35 years of service.

Combined with our strong training, mentorship, and quality assurance and control program, CPP has the flexibility to assign staff with the right experience and seniority to maximize quality.

We strive to create innovative solutions on a client-by-client basis and welcome the challenge of solving unprecedented environmental challenges. We recognize that each of our clients face unique problems, and we work closely with them to ensure we have a comprehensive understanding of our clients' needs.

At CPP Environmental, we face complex problems head-on, analyzing every angle, assessing the risks, and developing comprehensive solutions. Our multidisciplinary team applies its broad knowledge to support the aggregate, construction, development, industrial, mining, and oilsands sectors. We support municipal, provincial, and federal governments, and non-profit organizations as well as First Nations and other Indigenous communities. CPP Environmental finds creative solutions tailored to meet the specific needs of each of our clients. We draw on in-depth knowledge in a variety of fields to offer support in all our service areas.

## REGULATORY APPLICATIONS

CPP Environmental helps natural resource developers, municipal districts, and counties submit applications to regulatory bodies, including provincial and federal agencies. Our understanding of the complexities of regulatory filings and proceedings ensures that applications are completed efficiently and precisely to secure a positive outcome. We handle:

- Client adherence to federal, provincial, and municipal regulations
- First Nations/Métis Settlement consultations
- Wetland policy assessment, classification, and compensation
- Municipal permit applications
- Government relations and client representation
- Compliance audits and stewardship initiatives

## ENVIRONMENTAL ASSESSMENTS

CPP staff are government-certified in assessing terrestrial and aquatic habitats. Each environmental assessment we oversee results in the preparation of concise, professional reports with visuals and accessible language to explain methods and results. Our environmental assessment services include:

- Ecological and wildlife surveys
- Reclamation material testing and sustainability
- Wetland identification, delineation, and assessment
- Surface water and groundwater testing and assessments, including paleolimnology
- Cumulative effects and environmental impact models and assessments
- Monitoring program design and operations
- State of the environment reports

## WETLAND ASSESSMENT

CPP is a leading wetland and watershed consultancy in Alberta. We conduct all aspects of wetland delineation, assessment, classification, planning, design, construction, and provide client/government relations on many varied issues, including:

- Wetland identification, delineation, and classification
- Wetland restoration design and construction
- *Water Act* applications and non-compliance orders
- Alberta Wetland Rapid Evaluation Tool- ABWRET-A and ABWRET-D
- Biophysical impact assessment
- Wetland Assessment and Impact Reports
- Wetland monitoring

## PLANNING AND STRATEGY DEVELOPMENT

CPP Environmental develops comprehensive operations, monitoring, and reclamation plans that take into consideration industry, regulator, and stakeholder priorities, along with environmental, social, and economic factors. We also provide educational seminars and advice for clients and their staff on a wide range of policy and strategic topics, including:

- Land-use planning
- Public and private land gravel planning, exploration, and testing
- Regulatory review and evaluation
- Stakeholder engagement and consultation
- Conservation, reclamation, and revegetation plans
- Reclamation certificate applications
- Terms of reference
- Reclamation guidance documents and frameworks
- Risk management and mitigation
- Educational programs
- Watershed management planning

## PROJECT SUPPORT SERVICES

At CPP Environmental, we pride ourselves on our project management skills. We can transfer this knowledge and experience to your projects to ensure budgets and deadlines are respected. We provide a wide range of expertise and technical support services on a day-to-day basis. Our project support services include:

- Strategic planning
- Geographic information systems analysis and mapping
- Technical support in various environmental disciplines with certification in agronomy, forestry, biology, and wetlands
- Peer review and expert opinion
- Field inspections and audits
- Construction monitoring/QAES work
- Air photo interpretation and analysis
