# SAND AND GRAVEL MANAGEMENT SERVICES

Aggregate is one of the most mined resources in the world. It is a non-renewable resource and as such must be protected and respected.

Aggregate extraction is very tightly regulated in Alberta, with over 20 regulations and policies from all orders of government guiding the acquisition, operation, and reclamation of a gravel pit. CPP Environmental is here to help you navigate that rocky terrain!

CPP Environmental has successfully planned over 10,000 acres of gravel pit development in Alberta. We have a dedicated team specializing in aggregate projects, an in-depth knowledge of regulatory proceedings, and strong professional relationships with regulators. All this means your applications are completed correctly and efficiently, compliance issues are dealt with, and you get your approvals faster.

## SERVICES

### REGULATORY APPLICATIONS

- All Municipal, Provincial and Federal Applications and Permitting
- *Water Act*
- Reclamation Certificate

### PLANNING

- Gravel Exploration, Testing and Feasibility Studies
- Conservation Operations and Reclamation Plan (CORP)
