# WETLAND MANAGEMENT SERVICES

Wetlands cover approximately 20% of Alberta's surface area. These areas are crucial for protecting our water quality, provide habitat for a diverse array of animal and plant life, and must be protected.

Under the Alberta Wetland Policy, any activity in or near a wetland requires *Water Act* approval and a qualified environmental professional to authenticate any regulatory application documents. CPP Environmental is here to help you avoid feeling swamped!

CPP Environmental has worked on wetland assessments for the industrial, public, and non-profit sectors across Alberta. With our dedicated team's in-depth knowledge of regulatory proceedings and strong professional relationships with regulators, your applications are completed correctly and efficiently, compliance issues are dealt with, and you get your approvals faster.
